The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

> A person shall be entitled to a patent unless --
> (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8, 9 and 30-36 are rejected under 35 U.S.C. § 102(a) as being anticipated by Maekawa et al. (WO 01/07518, cited by applicants).

Maekawa et al. disclose an aqueous dispersion containing a block copolymer having a block "A" composed of olefinic units, a block "B" composed of carboxyl groups in combination with at least 0.05 equivalents of base. Note Example 3 for the use of polypropylene in the dispersion. Although the word "tackifier"

does not appear in the patent, the block copolymer is disclosed to have adhesive qualities and could therefore reasonably be construed as a tackifier. However applicants' claims 11-13 recite "further comprises a tackifier" and therefore clearly claims 11-13 require additional materials as the tackifier. Therefore claims 11-13 are allowable over Maekawa et al.

Applicant cannot rely upon the foreign priority papers to overcome this rejection because a certified translation of said papers has not been made of record. See MPEP § 201.15.

The non-statutory double patenting rejection, whether of the obviousness-type or non-obviousness-type, is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent. *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); and *In re Goodman*, 29 USPQ 2d 2010 (Fed. Cir. 1993).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(b) and (c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.78(d).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 8-13 and 27-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 6,610,774. Although the conflicting claims are not identical, they are not

patentably distinct from each other because the instant claims do not exclude polyurethane as a component as recited by the patent claims and the molar percentages of backbone units overlap in the application and patent claims.

It is noted that Maekawa et al. (U.S. 6,451,901) is the corresponding U.S. patent for the above Maekawa WO '518, relied upon above and the disclosures of the two patents are therefore presumed to be substantially the same.

Anthony et al. (U.S. 6,437,040), cited of interest suggests applicants' block copolymers but fails to suggest applicants' component ii.
